

# Togetherness

zoom | chrome OS

## Bringing educators and learners closer.

Hybrid learning is here to stay. Expand the minds of students everywhere with the new Zoom Progressive Web App (PWA) for Chrome OS. Powerful, open cloud collaboration designed to bring your hybrid learners together.

### Continually improve

Never miss the latest and greatest Zoom features with automatic updates.

### Provide peace of mind

Stay in control with remote, centralized configuration and security options.

### Facilitate connection

Connect hybrid learning through easy, remote installing on any device and platform.

### Minimize distractions

Improve efficiency and reduce downtime needed for updates and patches by utilizing a PWA.

## Enhanced Chrome OS.

### Improved performance

No unnecessary data processing with enhancements to Chrome OS camera and video feed performance.

### Improved efficiency

Automatic background updates every six weeks to mitigate downtime and improve efficiency.

### Improved security

Advancements to multi-layers security, with automated features and simplified security management.

## Zoom functionality on a Chromebook.

The PWA is open for use on any device, but Chromebook users can expect an improved Zoom experience.

### Teachers hosting a class can:

- ✓ Access the Security icon in the meeting controls to lock the meeting, enable the Waiting Room, and remove participants
- ✓ Share their entire screen or just a single application window
- ✓ Record the session to the cloud (if using a paid Zoom account)
- ✓ Create and assign Breakout Rooms
- ✓ Share audio with your screen shares
- ✓ Upcoming features include the ability to use a whiteboard when sharing your screen

### Students attending a class can:

- ✓ View a teacher's shared screen and share their own if enabled
- ✓ Use nonverbal feedback like Thumbs Up and Thumbs Down
- ✓ Raise hand feature to ask a question
- ✓ Chat with the teacher
- ✓ Join Breakout Rooms created by the teacher

## Get started using the new PWA today!
